AI credits: how to buy them, the volume tiers and what each request uses

All in One AI | Created on **November 26, 2026** | Updated on **November 27, 2026** | 2 min read

In short: you buy AI credits on the **Buy credits** tab of All in One AI. The minimum purchase is **1,000 credits**. The more you buy, the less each credit costs. Credits work with every model: in the API, in the Playground and in your agents.

The volume tiers

Quantity	Price per credit
From 1,000 to 10,000 credits	The base price.
From 10,001 credits	Lower than the base price.
From 100,001 credits	The lowest price.

The price of each tier, in your currency, is on the tab itself. As you type the quantity, the page shows what you pay, the discount and how much you save against the base price. If you are close to the next tier, it tells you how many more credits you need for a lower price per credit.

Buying, step by step

1. On the **Buy credits** tab, type how many credits you want.
2. Check the order summary. An invoice is created, just like any other purchase.
3. Pay the invoice. The credits are added as soon as the payment is confirmed, and you get an email with your new balance.

VAT, where it applies, shows on the payment page. Your top-ups and any unpaid invoices are listed on the same tab. You can also buy through the API, with your account balance, at the same price: see **Buying credits** in the documentation.

AI credits are not your account balance.
The balance in USD pays invoices. AI credits only pay for AI requests, and you see them in All in One AI. For the account balance, see **credit balance in your account**.

What each request uses

It depends on the model. Text models charge for input and output tokens. Images are charged per image, video per second and voice per generation. Each model's price is on the Models tab. Before each request we reserve the maximum cost and at the end we charge only what was used: the rest goes back to your balance. A generation that fails costs nothing. See **how a chat request is charged**.

Do you code every day?
The Coding Plan gives you points every week for the coding models, and your credits stay for everything else. See **the plans for coders and creators**.

RECOMMENDED

Need more credits? See the tiers on the Buy credits tab.
