An AI gateway for companies in Mozambique and Angola: AI models with a local account and invoice

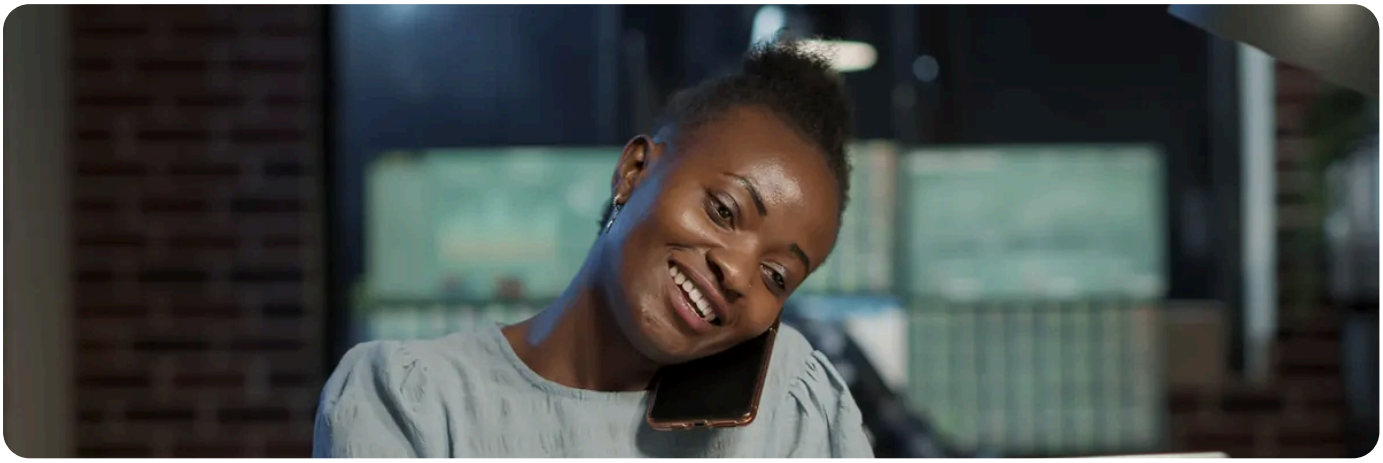
Getting Started & Activation Created on **November 29, 2026** 2 min read



Developers in Mozambique or Angola who want to use AI models often hit the same walls: opening an account with a company abroad, paying in a foreign currency and getting support in another language. All in One AI is the AI gateway from MozOut: the same models, with the account you already have with us.

What a local account changes

What	How it works
Account	Your MozOut account, the same one as your domains and other services. You activate All in One AI in My MozOut, with no other sign-up.
Payment	AI credits bought on an invoice in My MozOut, in your account currency. You do not need a card: see **how to pay without an international card**.
Invoice	Issued by MozOut, like the ones for your other services with us.
Support	Our team, in Portuguese or English, through a support ticket.
Key	The same API key works for AI and for the rest of our API: domains, DNS, SMS. See **one key for everything**.

Where the models run

The models do not run on our servers, nor in the country. The request goes from your program to our address, `api.mozout.com/v1`, and on to the service that runs the chosen model. So, before you send your customers' personal data, read **what happens to what you type into an AI service**.

Where to start

1. Log in to My MozOut and open **All in One AI**. See **how to activate it and get the welcome credits**.

2. Create a key in the **API Center**, with the `ai:read` and `ai:write` permissions. Start with a `sandbox_` key, which spends nothing.

3. Point your program at `api.mozout.com/v1` and pick a model on the Models tab.

4. When everything works, buy credits on the "Buy credits" tab and switch to the `prod_` key.

RECOMMENDED

Already have a MozOut account? Activate All in One AI.
