The History tab: what each AI request spent, with filters and CSV export

AI Credits & Costs Created on **November 28, 2026** 2 min read

The **History** tab shows every request made to AI: through the API (including the `aio` command and coding tools), in the Playground and by your agents. For each one you see the model, the key and the credits spent. Only the account owner sees this tab.

What it shows

Part	What it has
The figures at the top	Requests, Credits spent, Models used and Keys used, for the chosen period.
Requests and credits per day	Two charts. "See the numbers" shows each day's values in a table.
By model and By key	The requests and credits of each model and each key. Click a name to filter by it.
The list	Date, Model, Type, Key, Mode, Tokens, Credits and Status of each request, newest first.

The filters

Choose **From** and **To**, the **Type** (Text, Image, Video or Audio), the **Model**, the **Key** and the **Mode** (Production or Sandbox), then click **Filter**. The figures and charts follow the filters. In **Show** you choose 10, 25, 50, 100 or All per page.

The details of a request

Click **View** on a row. The window shows the model, type, mode, key, input, output and cached tokens, credits, status, request number and the Correlation ID, with a Copy button. The statuses are Completed, In progress, Failed, Refunded and Cancelled.

Exporting to CSV

The **Export CSV** button downloads a file with the requests for the filters you chose. When there are many requests, the page shows only the most recent ones and tells you so. To see them all, filter or export the CSV.

Requests made on the page show with the key "All in One AI Playground". Requests from people on your team show here too. Contacting us about a request? See **where the Correlation ID is**.

RECOMMENDED

Want to see what you spent this month? Open History.
