Paying for an AI gateway without an international card: credits on an invoice in your account currency

AI Credits & Costs Created on **November 29, 2026** 2 min read

With All in One AI you do not pay for each request by card. You buy **AI credits** on an invoice in My MozOut, in your account currency, and pay that invoice like any other: with the methods the invoice itself shows, many of them without a card. Each request to the gateway then spends those credits.

Buying credits, step by step

1. Open **All in One AI** in My MozOut and go to the "Buy credits" tab.
2. Choose how many credits you want. The price per credit goes down on larger purchases, and the tiers are on the tab itself.
3. Place the order. An invoice is created in your account currency.
4. Pay the invoice with the method you prefer. The credits reach your balance when the invoice is paid, and you get the "AI Credits Added" email.

Paying without a card

The credits invoice is an invoice like any other, so it accepts the same methods. The ones available to you are in **paying without a card: the methods we accept** and on the **payment methods** page.

Paying with your account credit, through the API

If you have credit on your MozOut account, you can buy AI credits with it, through the API. `GET /v1/ai/credits/prices` shows the price by quantity and `POST /v1/ai/credits/purchase` buys them, at the same price as in My MozOut. You need the `billing:purchase` and `ai:write` permissions and the `Idempotency-Key` header. See **buying AI credits through the API**.

AI credits and your account credit are not the same thing.
Account credit in USD pays invoices. AI credits pay for requests to the models. One does not turn into the other on its own. See **where account credit comes from**.

Before you buy, check what the model you will use costs, on the Models tab. Then you know how many credits you need. See **how to read a model's price**.

RECOMMENDED

Want to buy credits? Open All in One AI.
