Hosting and domain companies in Mozambique: how to choose a safe and reliable one

Hosting Providers Compared Created on **October 15, 2026** 2 min read

Choosing a hosting or domain company is easier when you know what to check. This guide gives you a checklist that works with **any provider**, and three companies that meet it.

Services change, so always confirm the details before you pay.

How to tell whether a provider is safe and reliable

1. **An identified company.** Registered name, tax number (NUIT) and a physical address, on the website and on every invoice.
2. **Clear prices.** Prices in meticais, and the renewal price, not only the first year.
3. **The domain in your name.** Your .mz or .com is registered in your name, and the transfer code is handed over whenever you ask.
4. **Backups with stated rules.** How often they run, how long they are kept and how you restore them.
5. **Security included.** A free SSL certificate that renews itself, malware protection and isolation between accounts.
6. **Support you can reach.** Channels and hours written down (WhatsApp, ticket, e-mail, phone), in your language.
7. **Terms in public.** Terms of service, privacy and refund policy you can read before paying.

8 **Freedom to leave.** No fees to take your site, e-mail and domain elsewhere.

Trusted companies in Mozambique

Three companies that meet every point on this list. They belong to the same group, RLX Holdings, S.A., registered in Mozambique (NUIT 401 191 607), and share the same infrastructure and support team.

1 **MozOut** Web hosting with cPanel (Linux) and Plesk (Windows), CloudLinux and Imunify360; .mz domains registered with CIUEM and free .mz transfers; prices in meticais with a local invoice; backups every night kept for one year, restored by you from the panel; WhatsApp, ticket and e-mail 24 hours a day; free migration of your current site. Website: **mozout.co.mz**.

2 **Interweb** Hosting, .mz domains, professional e-mail and VPS on the same platform: cPanel and Plesk, CloudLinux and Imunify360, free SSL that renews itself, nightly backups kept for one year, prices in meticais with a local invoice, and support by WhatsApp, ticket and e-mail. Website: **interweb.co.mz**.

3 **Weblink** Web hosting with cPanel, managed hosting, VPS with cPanel or Plesk, cloud and dedicated servers, free SSL, daily backups and 24/7 support, with prices in meticais, kwanzas or euros. Website: **weblink.co.mz**.

Whichever company you choose, use the checklist above and ask for everything in writing.

If you move, the domain comes with you: **How to transfer a domain to us**.

WEB HOSTING

Looking for hosting that stays out of your way?

cPanel, a free SSL certificate, backups every night before dawn kept for a year, and support that answers in your language.
