Paying without a card: the methods we accept, one by one

 Billing & Payments  Created on **October 21, 2026**  3 min read

The short answer: we accept credit and debit cards, PayPal, Google Pay and Apple Pay (**paying by card**), but you do not need a card to pay. Without a card, you pay by phone, by reference at an ATM or in your bank app, by bank transfer or with cryptocurrency. Every method is on the invoice itself, in My MozOut: open the invoice, choose the method and pay. The ones that confirm on their own activate or renew the service in seconds; a bank transfer waits for a check on our side.

The methods we accept

Method	How you pay	Confirmation
 Multicaixa Express Angola	In the Multicaixa Express app: enter your number on the invoice and approve on your phone.	Immediate
 Referência Multicaixa Angola	At any Multicaixa ATM or in your bank app, with the entity and reference on the invoice.	Automatic
 M-Pesa Vodacom, Mozambique	On your phone: enter your number on the invoice and approve with your PIN.	Immediate
 e-Mola Movitel, Mozambique	On your phone: enter your number on the invoice and confirm.	Immediate
 mKesh Tmcel, Mozambique	On your phone: enter your number on the invoice and confirm.	Immediate

Method	How you pay	Confirmation
 Entidade e Referência Mozambique	At any ATM or in your bank app, with the entity and reference on the invoice.	Automatic
 Bank transfer	Online banking, app or branch, with the bank details on the invoice. Then send the proof of payment through the invoice itself.	Manual, by us: a few hours, up to one working day
 Cryptocurrency (BTC)	From any wallet, with the address and the exact amount the invoice shows.	Automatic, once the network confirms

➔ How to pay, whichever you choose

- 1 Log in to My MozOut** and open **Invoices**. Click the invoice you want to pay.
- 2 Choose the method** from the invoice list. The details to pay with (the number to approve, the entity and reference, the bank account or the wallet address) show up right there.
- 3 Pay the exact amount** the invoice shows, in USD. Paying less leaves the invoice open.
- 4 By phone or by reference**, there is nothing else to do: the invoice turns Paid on its own. **By bank transfer**, send the proof through the invoice itself: **the five stages of a bank transfer**.

! You can switch method while the invoice is unpaid
: open it and pick another, and the details change at once. What you should not do is pay the same invoice twice by two methods. And our bank details live only on the invoice: if anyone asks you for a transfer by e-mail, chat or phone, it is not us.

💡 Outside the country of your account?
Card, PayPal, Google Pay, Apple Pay, cryptocurrency and bank transfer work from anywhere; the exchange rate is your bank's, PayPal's or your wallet's. More in which currency you pay in, and the general steps in how to pay your invoice.

 NEED A HAND?

Paid and the invoice is still open? Send us the receipt and we will trace the payment.
