Becoming a reseller: the plans, what is included and how to start

Reselling & WHMCS Created on **September 10, 2026** Updated on **September 28, 2026** 3 min read

Reselling hosting means selling space on our servers **under your own brand**. Your customers buy from you, pay you and talk to you - and they never need to know we are behind it.

It is the natural next step for anyone already building sites, managing several clients, or looking for recurring revenue that does not depend on landing the next project.

What is included

A reseller plan gives you **WHM** - the panel where you create cPanel accounts for your customers, decide how much each one gets, and suspend or reactivate them without talking to us.

You get	Detail
Independent accounts	Each customer gets their own cPanel with its own password. They cannot see each other, or you
Unlimited traffic	On every reseller plan
E-mail and databases	Unlimited, shared out by you across the accounts
Your own nameservers	Your customers point at your names, not ours
The infrastructure is ours	Server, security, backups and updates stay on our side

The plans, and how to choose

They differ in two things: **space** and **number of accounts**. Traffic is unlimited on all of them.

cPanel plan	What it carries
cPanel-RI	50 GB SSD · up to **10** cPanel accounts
cPanel-RII	120 GB SSD · up to **30** cPanel accounts
cPanel-RIII	250 GB SSD · up to **60** cPanel accounts

If your customers run Windows, there is an equivalent **Plesk** line - and it carries more accounts for the same space:

Plesk plan	What it carries
Plesk-RI	50 GB SSD · up to **30** Plesk accounts
Plesk-RII	120 GB SSD · up to **60** Plesk accounts
Plesk-RIII	250 GB SSD · up to **120** Plesk accounts

Start small.
RI is enough for the first customers, and you move up without anything changing address - see **how to upgrade or downgrade your plan**. Growing costs less than buying space that sits empty.

How to start

1. Choose the plan at **www.mozout.com** and complete the order.
2. You get your WHM details by e-mail. That is where you create your customers' accounts.
3. Register your own nameservers so customers point at you. Ask us and we will help set them up - see **nameservers: what they are and which ones to use with us**.
4. Create the first account and test it end to end before selling to anyone.

What to do inside WHM, step by step, is in **first steps as a reseller**. And the difference between the panels is in **My MozOut vs WHM: what each one is for**.

Reseller or partner?

Reselling is self-service: buy the plan and start. If you are after something else - large volume, bespoke terms, or representing us in a region - that is handled case by case. Write to us and say what you have in mind.

You answer your customers.

We look after the server; support for *your* customers is yours, because the commercial relationship is yours. We are here for anything infrastructure, and there we answer to you.

NEED A HAND?
