Who can use All in One AI on your account: the owner and the people you allow on the Team tab

Getting Started & Activation Created on **November 28, 2026** 2 min read

All in One AI belongs to the account owner, the person who owns the MozOut account. Other users on the account can only use it if the owner gives them access on the **Team** tab, with a monthly credit limit if the owner wants one.

What each person can do

What	Owner	Person with access
Playground, Models and Agents	Yes	Yes
History and Connected apps	Yes	No
Buying credits and the plan	Yes	No
Account spending limits and the Team tab	Yes	No
Activating and deactivating All in One AI	Yes	No

A person with access spends the account credit balance and only sees their own conversations. Their requests show up in the owner's History.

Giving access, step by step

1. If the person is not yet a user on the account, invite them in **Manage users**, in My MozOut.
2. Open All in One AI, **Team** tab. The users on the account are listed.
3. On that person's row, tick **Can use**. If you like, type a **Monthly limit**, in credits. Empty means no limit.

4 Click **Save**.

The monthly limit

The limit counts the credits spent since the 1st of each month. Whoever reaches it gets a notice and spends no more until the next month. The **Spent this month** column shows how much each person has already spent.

Without access

A user without access who opens the page sees that they do not have access yet and must ask the owner. To remove someone's access, untick **Can use** and save. If All in One AI is not active yet, only the owner can activate it.

API keys do not go through the Team tab.
A key spends the account balance without any person's limit. Only give keys to people who need them, and check what each one spent in History. See **how to stop a program from spending credits**.

RECOMMENDED

Want to give your team access? Open the Team tab in All in One AI.
