Reading a model's price: credits per million tokens, per image, per second or per generation

AI Credits & Costs Created on **November 28, 2026** 2 min read

Each model has its own price in credits, and the unit changes with the type of model. You see it on the **Models** tab and in `GET /v1/models`, in the `pricing` field.

The units

Type	Unit	Example from the documentation
Text	Credits per 1 million tokens, with an input price (`input`), an output price (`output`) and a cached input price (`cached_input`).	`deepseek-ai/deepseek-v4-flash` : 56 per million input tokens and 112 per million output tokens.
Image	Credits per image (`unit` `image`).	`openai/gpt-image-2/text-to-image` : 2 per image.
Video	Credits per second of video (`second`).	`bytedance/seedance-2.0-mini/text-to-video` : 18 per second.
Voice	Credits per generation (`generation`).	`elevenlabs/v3/text-to-speech` : 40 per generation.

The values in the table are examples: the current price of each model is always on the Models tab and in `GET /v1/models`.

Quick sums

Type	Sum	With the example prices
Text	(input tokens × input + output tokens × output) / 1,000,000	1,000 input and 500 output: 0.112, rounded up to 0.12

Type	Sum	With the example prices
Image	images × price	4 images: 8 credits
Video	seconds × price	a 5-second video: 90 credits
Voice	generations × price	one generation: 40 credits

On the Models tab and in the Playground

For text models, the Models tab shows input and output in credits per 1 million tokens, and the context. For the others, the credits and the unit: per image, per second or per generation. For images, the listed value is the base price. Before generating, the Playground shows the expected cost with the options you chose: it is reserved and, at the end, you pay the real cost and get the difference back.

Through the API, a single model, with its id exactly as it is:

```
curl "https://api.mozout.com/v1/models/deepseek-ai/deepseek-v4-flash" -H "Authorization: Bearer $MOZOUT_API_KEY"
```

Prices are in credits, not in USD.
What each credit costs in your currency is on the Buy credits tab. See **the volume tiers**.

RECOMMENDED

Want to compare prices? Open the Models tab.

See All in One AI →
