Testing your agent with the Try it button: real answers and the cost of each one

Creating AI Agents Created on **November 28, 2026** 2 min read

Try it is a chat inside **All in One AI** where you talk to the agent the way a customer would. Use it to tune the instructions and the knowledge before you put the agent on a website or in a program. The button is on each row of the Your agents list and at the top of each agent, next to Settings, Knowledge and Use through the API.

The two modes

Mode	What happens
Production	The agent answers for real, with the model, the knowledge and the tools. It uses your account credits, as in the API.
Sandbox (free)	A test reply, without calling the model and without using credits. It shows that everything works, but not what the agent would say.

To judge the answers, use Production.

The cost in plain sight

1. Before the answer, Try it shows the maximum cost: the input tokens, instructions and knowledge included, and the maximum output. It is the worst case: in the end you only pay for what the agent used.
2. After the answer, it shows the real cost, with the input and output tokens, and the balance left. If the real cost takes a while, it shows up in History shortly.
3. In History, the request appears as "All in One AI Playground", with the model `agent/<id>`.

The conversation

The conversation is saved under Conversations, so you can come back to it. New conversation starts from scratch and Stop interrupts the answer. With Private mode on, the conversation is not saved and creates no memory, but the request still goes to the model and is charged.

A paused agent cannot be tried: activate it first.

What to ask

1. The questions customers ask most, written the way they write them.
2. A question whose answer is not in the knowledge. The agent should say it does not know.
3. A request the agent cannot accept, such as a discount.
4. If it has tools turned on, a question that needs them, such as "are you open today?".

Change one thing at a time in the instructions and repeat the same questions. That way you see what got better. Ideas for the instructions are in **writing your agent's instructions**.

RECOMMENDED

Want to see your agent answer before it goes live? See All in One AI.
