Weekly points in the Coding Plan: they come back every Monday at 00:00 UTC

Coding Plan Created on **November 28, 2026** 1 min read

The weekly points of the Coding Plan come back every Monday at 00:00 UTC. Whatever is left does not carry over to the next week.

How much you get per week

Plan	Points per week
Starter	16.5 million
Lite	33 million
Plus	82.5 million
Max	165 million
Ultra	330 million
Enterprise	825 million

The right time in your time zone

00:00 UTC is the same moment all over the world, but your clock may show another time. The **Plan tab** shows the reset time in local time already, and says which time zone it uses. Through the API, `weekly_resets_at` in `GET /v1/ai/balance` gives the exact moment, in ISO 8601, for example `2026-11-23T00:00:00+00:00`.

Points do not add up

If you use half in one week, on Monday you get the full weekly amount again, and no more. There is no point saving points for later.

If they run out before Monday

By default, the tools keep going and pay with the credits in your balance, at the normal price: **carrying on with credits or stopping**. If it happens every week, think about a bigger plan, with **Change plan** in the Plan tab.

> The monthly limit counts too. Even with weekly points left, if the monthly ones run out, they only come back on renewal: **which limit counts first**.

RECOMMENDED

Want fresh points every week to code? Visit the Coding with AI page.
